ADDITIONAL INFORMATION

Skill

ReactJS, Javascript, Typescript

HTML, CSS, animation

AI-Powered Development

Web3

Photoshop

Hobby

- Coding
- Travelling
- Movies

SUMMARY

- **7+ years** of web development experience, including **5 years** with **ReactJS** and **2 years** in full-stack development with **Python/Golang/Nodejs**.
- **3+ years** of hands-on experience integrating EVM smart contracts into React applications using ethers.js, wagmi, and related Web3 tooling.
- Strong proficiency in **ReactJS**, **Next.js**, with strong experience using tools like **Redux**, **TanStack Query**, **Zustand**, **Tailwind CSS**, **MUI**, **Chakra UI**, **Framer Motion**, **Three.js**....
- Experienced with **Python** (FastAPI), **Golang**, **Nodejs**, **REST APIs**, **PostgreSQL**, **Redis**....
- Strong understanding of web **performance optimization**, focusing on rendering efficiency, bundle size reduction, caching, and Core Web Vitals.
- Working knowledge of **AI application** architecture, including **RAG**, vector databases, embeddings, prompt engineering, and **LLM** integration.
- Proven ability to work independently and in teams, delivering **high-quality solutions** in fast-paced environments.
- Proficient with **AI-assisted** development workflows using **Cursor**, **Claude Code**, and modern AI tools to accelerate development, refactoring, testing, and debugging.

PERSONAL PROJECT

- **Fintech Stock Platform** – A web platform for Vietnam's stock market: https://xno.vn/
- **Kyberswap Landing Page** – Dev version: https://kyberswap-landingpage.vercel.app/
- **E-commerce Website** – Developed with Next.js and Tailwind CSS: https://ymart-delta.vercel.app/

WORK EXPERIENCE

1/2025 - Present

IP World | **Senior Fullstack Engineer**

Website: https://ip.world

ip.world is a blockchain-based SocialFi and memecoin launch platform built on the **Story Protocol** ecosystem, designed to transform internet intellectual property (IP), including memes, brands, and cultural content, into programmable, tradable on-chain assets.

- Developed and maintained scalable frontend applications using **React.js** and **Next.js**.
- Integrated wallet connectivity, smart contract interactions, and on-chain transaction flows for token creation and tokenization features.
- Contributed to backend and Web3 infrastructure integration, including API communication, blockchain data handling, and decentralized ecosystem workflows using **Golang**.
- Improved UX for community-driven engagement and creator-focused experiences within the platform.
- Took **ownership** of major **frontend tasks**, delivering features rapidly while maintaining clean architecture and code quality.
- Leveraged **AI-assisted** development tools such as **Cursor** and **Claude Code** to accelerate development and efficiently convert designs into maintainable production-ready UI.

02/2024 - 12/2024

UNIBOT | **Senior Frontend Engineer**

- Built and maintained multiple **Web3** frontend applications using **React** and ethers.js, including:
    - revshare.unibot.app
    - perps.unibot.app
    - unisol.app/swap
    - unibot.app
- Took **ownership** of most **frontend tasks** at the company, delivering features quickly without compromising code quality.
- Specializing in **rapid** development using **ReactJS** and **TailwindCSS**, maintaining clean and scalable codebases.
- **Collaborated** with backend and smart contract teams to ensure **seamless integration** of blockchain functionality.

08/2021 - 01/2024

KYBER NETWORK | **Frontend Engineer**

- Developed and enhanced major features for KyberSwap, including::
    - **Trading Chart UI**: Integrated TradingView charts on the Swap page.
    - **KyberDAO Pages**: Stake, migrate, vote UI/UX (example).
    - **KyberAI Pages**: An AI-powered insights dashboard (now deprecated; images available on request).
        Note: After the **Kyberswap** exploit, this feature has been deprecated in order to reduce company costs. As a result, there is currently no live version available. But I can provide some images of it.
    - Developed and deployed the **KyberSwap Landing Page** (dev version).
- Improved **frontend performance** by optimizing load times and transitioning the build system to **Vite**.
- Created **interactive** and **animated UI components** for a better user experience.
- Closely worked with cross-functional teams to integrate APIs and smart contracts using ethers.js.

04/2016 - 05/2019

2 CLICKS SOLUTION | **Fullstack Engineer**

- Built a front-end automotive **eCommerce website** from scratch with **React** framework.
- Contributed to 2 other **React** projects, **Issue Ticket Managing** site, **Custom Form Builder** site.
- Supported new juniors, being **Scrum master,** helped other teammates to finish tasks.
- Worked with team to discuss new features and future scope of projects.

Technologies:

.Net, **Javascript**, **ReactJS**, **NextJS**, **HTML**, **CSS** ...

EDUCATION

09/2012 - 05/2016

HO CHI MINH CITY UNIVERSITY OF SCIENCE | Information Technology
